

737C

Manually Operated Shrink Bundler

ARPAC®

A DURAVANT COMPANY

Shown with Optional Tunnel

APPLICATIONS

- Boxes
- Trays
- Cartons
- Any Other Conveyable Product

MACHINE FEATURES

- Ultra-compact rugged steel construction
- Laser cut and CNC machined components for maximum precision
- Powder coat finish that provides a durable scratch resistant surface and prevents corrosion
- Electronic controls ensure smooth operation and easy integration into existing production facilities
- Safety system on seal jaws prevents seal jaw or package damage in case of product jams
- Adjustable seal bar opening allows operator to raise or lower seal line to improve package appearance
- Powered film feed – top and bottom rolls automatically adjust to varying depths and heights of intermixed bundles
- Welded seam ensures consistent seals, stronger than the film itself. No open seams for consistent looking packages
- Seal cleaning film cut off hot knife burns through film cleanly with no film residue build up on the knife

SPECIFICATIONS

Speed

- Manually fed and manually operated seal bars or up to 15 bundles per minute

Power Requirements

Electrical

- 120VAC, 1Ph, 60Hz, 15A
