

FillPak[®] TTC

Fast and optimal void fill,
Seamless integration

Cost effective

Converter operates at a high speed for maximum box throughput

Flexible

Requires minimal space and easily integrates into any packing environment

Simple

Easy to load, easy to use, fast and convenient automatic delivery option

The **flexible solution** for filling boxes in pack station environments

The FillPak Table Top with Cutter (TTC) converter forms single layer kraft paper into a high volume PaperStar[™] configuration for use as an optimal void fill material. It prevents products from shifting around in the box, ensuring damage-free arrival. The converter's automatic cut mechanism eliminates manual tearing of paper. The FillPak TTC is ideal for use in both high and low volume operations.

Go Green

Our company works with FSC and SFI certified suppliers. Paper is a recyclable and a renewable source.

Specifications:

Converter

- Dimensions: 17" x 24" x 14"
- Weight: 27 lbs.
- Power: 100/115 VAC
- Feed Rate: 70 in./sec.
- Cut method: Automatic

Paper

- Paper Options: 30, 40
- Bundle length: 1,660', 1,200'
- Bundle width: 15"
- Average bundle weight: 22 lb., 24 lb.

Our Added Value

Packaging Engineering

Ranpak will analyze your current packaging solution and perform a drop test, demonstrating how much shock is transmitted to your products through the packaging. Ranpak then suggests proper packaging techniques to improve protection and save costs.

Integrated Applications

The Ranpak Custom Engineering department can design modifications, customizations and other innovative solutions to integrate the packaging converter anywhere around, above or under a packing area.

Packaging Training

Training from our packaging experts can help your packers use up to 20% less packing material without compromising the quality of the packaging.

Successful in these industries

Apparel/Jewelry	Business Services	E-commerce	Chemical/Plastics
